Figure 1

CONTENTS

Figure 6. The effect of the number of iterations on the accuracy of the proposed algorithm. The figure shows two bar charts side-by-side. The left chart is for the 'Number of iterations' ranging from 0 to 100, and the right chart is for the 'Number of iterations' ranging from 0 to 100. Both charts show the 'Accuracy (%)' on the y-axis, ranging from 0 to 100. The bars represent the accuracy of the proposed algorithm at different iteration counts. In both cases, the accuracy increases rapidly in the first few iterations and then stabilizes around 95% after approximately 20 iterations.
