SIGNATURE A. J. Chamberlain

1. **Background** The purpose of this study was to investigate the effect of a 12-week, low-intensity, supervised exercise program on the physical and psychological health of older adults with chronic low back pain (CLBP). The study was conducted in a community-based setting, and the participants were recruited from a local senior center. The study was approved by the Institutional Review Board of the University of [redacted].

## CONTINUATION

[illegible]

Figure 1 shows the results of the regression analysis. The results show that the regression coefficients for the variables are all positive, indicating that the variables have a positive effect on the dependent variable. The regression coefficients for the variables are all positive, indicating that the variables have a positive effect on the dependent variable.
